Food & Confectionary – Air Filtration Equipment

Dry Dust Collectors
- High efficiency cartridge style or bag style units
- Pulse-jet cleaning systems for extended filter life
- Many available options including explosion vents

Wet Dust Collectors
- For the collection of sticky or explosive dusts such as sugar, flour and starch
- Eliminates the need to replace dirty filters
- Filtered air can be re-circulated back into the factory

Industrial Vacuum Systems
- Wet or dry systems available
- Useful for housekeeping duties or source capture from manufacturing equipment
- Filtered air can be re-circulated back into the factory

Fume Arms
- Available in polypropylene, galvanized or stainless steel
- Sizes from 2” to 8” diameters and up to 14’ long
- Accessories include lights, extension booms and fans

Cyclones
- Used for pre-separation of dust in heavy dust loading applications
- Available with drums, rotary airlocks or large storage containers to collect the dust
- Filtered air can be re-circulated back into the factory with the use of downstream filtration
