

Legend Cleanroom Systems

Versatile and Affordable

Legend pre-engineered, modular design cleanrooms are cost effective without the inconvenience of conventional "stick-built" construction.

Legend is available with 2" or 3" walls and its non-progressive construction design allows flexibility to expand or change the configuration as needed in the future.

The look of *Legend* reflects the quality of the system. Its clean visually appealing design utilizes aluminum framed wall panels with a durable white finish.

SAMlink Control Systems

SAMlink Control Systems are designed to adjust airflow to selected areas. Utilizing the setback feature during off-peak hours results in lower operating costs. Click on [SAMlink](#) for more information.

Flush Mounted Windows

Legend windows are flush mounted and assembled inside our cleanroom for meeting stringent cleanliness requirements.

Pre-Engineered For On-Site Assembly

Ceiling and wall panels, framing and ceiling T-bar is pre-cut at our factory for assembly on site, resulting in reduced installation time. A complete set of assembly drawings is provided for the installation.

Legend is a brand name owned by Clean Rooms International
